SUMMARY

AI Engineer experienced in building LLM applications, RAG pipelines, and agentic workflows. Focused on developing reliable, production-ready AI systems with Python, LangGraph, MCP, FastAPI, and vector databases.

EXPERIENCE

Coreason AI - AI Engineer Intern Jun 2026 - Oct 2026 | Mangalore, India

- Built customer-facing agentic workflows in Python & LLMs, cutting processing time by 40%.
- Developed modular MCP tools for distributed execution, lowering inference costs by 35%.
- Engineered RAG pipelines in PostgreSQL with pgvector, HNSW indexing, and tenant isolation.
- Automated RAG evaluation & CI/CD with RAGAS & GitHub Actions across 122+ test suites.
- Built offline voice recognition pipeline with sherpa-onnx indexing into Obsidian at 95% acc.

Goa Shipyard Ltd. - IT Intern Jun 2025 - Jul 2025 | Goa, India

- Deployed Complaint Management System with Flask & SQLite for 50+ enterprise systems.
- Automated user access onboarding workflows, cutting turnaround time by 15%.

PROJECTS & PATENTS

Fora AI: Autonomous Research & Intelligence Engine

- Cyclical reflection state graphs with MCP tools, cut research turnaround by 75%.

Smart News Synthesizer [Indian Patent Published]

- RAG news verification NLP pipeline using BERT & FAISS with 3-4s latency, F1: 0.71.

Pharma Watch: Drug Adverse Event Trend Analyzer

- Pharmacovigilance dashboard analyzing 100,000+ FDA FAERS adverse event reports.

EDUCATION

Nitte University - B.Tech in Computer Science | CGPA: 8.19 / 10 | 2022 - 2026
